# OPERATING INSTRUCTIONS

**Please Note:**

To assure proper installation, it is suggested that a qualified person or carpenter install the Koala Kare Baby Changing Station. Koala Kare Products will not be responsible if the station is not installed properly.

Koala Kare Baby Changing Stations have been tested to hold a substantial static load. The unit must be attached to a permanent wall that is capable of holding a substantial load.

**Inspection Criteria:**

A properly maintained Baby Changing Station:

- Opens and closes smoothly.
- Has both ends of a functioning, non-frayed strap: buckle clicks when closed and strap is attached at both ends of unit.
- Offers parents liners through a fully stocked liner dispenser. (Dispenser is built into unit).
- Provides a clean, convenient place for customers to attend to their children.

# INSTALLATION INSTRUCTIONS

## Baby Bear Baby Changing Station Model Number KB108

### Step 1.

Remove the station from the shipping container and check for any freight damage. Identify the best location for installing the unit. Hold the unit in place and open the bed. Make sure you have taken the operating clearance into consideration.

### Step 2.

Determine the best method of mounting based on the type of wall. You may have to purchase toggles.

### Step 3.

The oval unit has four mounting holes provided in the back wall, positioned on a 16" (406 mm) stud center. If possible, locate the wood or metal studs for fastening the unit in the desired location. If the walls do not have studs on center as outlined, make sure at least one side of the unit is installed into the stud. Use toggles for holes on the opposite side.

### Step 4.

Find the stud where you will be attaching the left side of the unit to the wall. Measure up from the floor 46" (1,168 mm), at the center of the stud, and mark the wall. Mark remaining holes using a measuring tape to make sure the holes are precisely positioned. Hold unit in place to verify. Use four 1/4" x 3" panhead wood screws with washers (supplied) to secure the unit to the studs.

If the wall surface is masonry or tile over studs, use a 7/32" masonry drill bit for the pilot hole until you hit the stud. Change bit to 1/8" regular drill bit. Use four 1/4" x 3" panhead wood screws with washers (supplied).

If the wall has wood studs that are not on 16" (406 mm) centers, has metal studs or an underlying surface of concrete block, drill with a 1/2" masonry bit. (You may have to purchase toggles before installing.) You must allow a minimum of inside wall space for toggles to turn depending on toggles used. Insert and tighten toggles.

### Step 5.

Position Koala sign (supplied) on the outside of the restroom door. Fill the built-in dispenser with sanitary bed liners. Replacement parts and additional liners can be purchased from your local distributor or by calling toll free 888.733.3456 or 303.539.8300.
